

Chemical Peels

Medical level peels using higher concentrations of acids to promote more visible skin texture improvements and intensive collagen stimulation. Type of peeling agent used is based on specific client criteria. Pricing may vary depending on number of layers applied. Prepping of skin may be required for 2-6 weeks prior to some peels. Free consultation is required.

	Starting at...
Glycolic 70%, Skin Brite, Salicylic 30	\$105.00
Jessners, Modified Jessners	\$135.00
TCA (Trichloroacetic Acid)	\$155.00

Other designer peels available, pricing determined at consultation.

Derma Pen / Skin Needling

	Starting at...
Individual Treatment	\$250.00
Series of 3 (\$150 Savings)	\$600.00

Skin needling allows for controlled induction of the skin's self repair mechanism by creating micro "injuries" in which the skin triggers a whole cascade of events that result in new collagen synthesis. The result is smoother, firmer and younger looking skin down the line. A great treatment for all skin types, especially clients with acne scarring, enlarged pores and moderate to severe wrinkling. Some prepping of the skin may be required to minimize color changes. Free consultation is required.

We are proud to offer Allergan products for our facial remodeling and participate in Allergan's Brilliant Distinctions Rewards Program.
