

Medical Microdermabrasion

A skin rejuvenation technique that promotes the formation of new, smoother, clearer skin and can ultimately improve the appearance of fine lines, wrinkles, acne, pore size and superficial pigmentation. This procedure is followed by a light application of lactic acid or an enzyme mask for further stimulation of cell repair. Crystal and crystal free options available. Face and neck are treated unless otherwise specified.

	Starting at...
1 hour	\$95.00
